PUBLICATIONS

Note re: publication norms: In *computer science* and *information science*, publishing mostly occurs in conference and workshop proceedings, and occasionally in journals. Within the subfield of natural language processing, the ACL conferences (ACL, EMNLP, NAACL, EACL, COLING etc) and associated journals are high-impact venues, with acceptance rates around 20-25%. For Human-AI work, the HCI conferences (CHI, ASSETS, IUI, CSCW etc) and associated journals are high-impact venues, with acceptance rates around 20-27%. In *health informatics*, publishing occurs in a mixture of journals, e.g., Briefings in Bioinformatics (IF: 8.99), Journal of Biomedical Informatics (IF: 6.32), Journal of the American Medical Informatics Association (IF: 4.11); and conferences, e.g., AMIA Symposium (~50% accept rate), ISMB (~20% accept rate), ML4H (20-25% accept rate).

* Indicates equal contribution
